

# Prepaid Cards vs. Postpaid Subscriptions

*Choose the best plan for your needs*

## Why Buy a Prepaid Card?

Prepaid cards are the ideal solution for short term projects and seasonal users who may use their phone only sporadically and want great airtime rates when they do. With no contracts or monthly bills, users can track and manage their own minutes and top up whenever they need more. Roadpost's prepaid cards are great for users who know how much airtime they'll need and don't mind managing their own account and usage.

## Why Buy a Postpaid Subscription?

Postpaid subscription services are best for users seeking maximum convenience and uptime. Postpaid plans offer all the convenience of uninterrupted service without concerns about airtime minutes expiring or the risk of running out of airtime. With Roadpost's subscription plans, users pay a monthly service fee and can choose from competitive airtime bundles with rollover minutes and options to pool minutes between multiple users. Roadpost's subscription plans provide peace of mind to users who need to ensure their satellite phone is always ready to go, without having to manage usage and airtime top ups.
